### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly discloses the dehalogenation treatment method comprising the steps of bringing the halogen containing non-combustible thermosetting resin composition in contact with a dehalogenation promoting material and a dehalogenation material at 200 degrees or higher and a temperature lower than a thermal decomposition temperature of the thermosetting resin composition, wherein the dehalogenation promoting material is capable of dissolving at least a halogen containing flame-retardant. Other embodiments involve the use of contacting by kneading while applying shear force. Still other embodiments involve the recovery of styrene or bromine.

As stated in the response, the prior art cited in the Office action fails to teach the claimed limitations. In particular, the Futamura patent heats the resin above the decomposition temperature to decompose the resin to obtain the oils. The Ueno patent fails to teach the dehalogenation material used with the dehalogenation promoting material as claimed.

Accordingly, the prior rejection has been overcome and the claims are found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
